MEGHALAYA PINEWOOD

PINUS KESIYA

Pinus kesiya (Khasi pine, Benguet pine or three-needled pine) is one of the most widely distributed pines in Asia.

Its range extends south and east from the Khasi Hills in the North East Indian state of Meghalaya, to northern Thailand, Philippines, Burma, Cambodia, Laos, Southernmost China, and Vietnam.

QUALITY HIGHLIGHTS

- Anti staining and High density of Meghalaya Pine is higher than any other species available in the market e.g. Malaysian or New Zealand Pine.
- Meghalaya Pine contains natural high tree oil which prevents it from Termite and Borer attacks.
- Meghalaya Pine has far superior screw holding capacity than any other pinewood in the market.
- Presence of high tree oil results in less bending tendency on the final product.
